

# DIABETIC CARE PLUS+

Combination of Rare Fruits & Herbs

Useful for  
**SKIN PIGMENTATION**

Supports to maintain healthy  
**BLOOD SUGAR LEVEL**

Supports to improve  
**DIGESTION**

Supports to maintain healthy  
**CHOLESTEROL LEVELS**

Supports to improve  
**DIABETES**

## KEY INGREDIENTS

Aloevera

Triphala

Karela

Jamun

## WHY DO WE NEED IT ?

Consuming excess sugars and fats found in unhealthy foods can contribute to weight gain. This excess weight is associated with diabetes. One of the top risk factors for developing type 2 diabetes is being overweight. Combination of factors like genetic susceptibility and lifestyle choices leads to insulin resistance. If your body is insulin resistant, it doesn't use insulin properly. Your body may produce enough insulin to transport the glucose to the cells (but unfortunately, the body resists that insulin). Glucose builds up in the blood when you are insulin resistant; leading to the symptoms associated with type 2 diabetes.

Hence a combination of science and nature is needed to maintain the natural insulin formation and its resistance due to external factors.

## WHY CHOOSE DIABETIC CARE PLUS+ ?

Diabetic Care Plus+ is a lab tested formula which intervenes with the insulin resistance of the body. It works on lowering the body glycemic index and leads to low blood glucose level. Combination of Karela, Jamun, Triphala with it directly works on obesity related rise in Hyperglycemia.

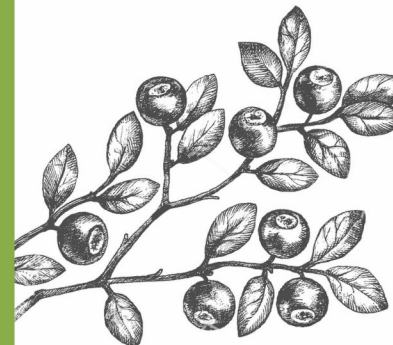

## HOW DOES IT WORK ?

Diabetic Care Plus+ reduces the glucose absorption in intestine and liver. It helps the Beta cells of Pancreas to regrow and synthesize more insulin. Phytoconstituents like Gymnema act as natural insulin and reduces the insulin resistance.

## RECOMMENDED DOSAGE

10-20 ml with 100 ml twice, 30-60 minutes before meal.

**SAFETY WARNING**

Children below the age of 12 years, Pregnant or Lactating women are advised to consult a doctor before using.
