Kulthi (Dolichos Biflorus)	150mg
Kusha Grass (Vetiveria Zizanioides)	100mg
Sheetal Chini (Piper Cubeba)	100mg
Palash (Butea Monosperma)	75mg
Nimbu Crystal (Citrus Acida)	50mg
Ikshu (Saccharum Officinarum)	50mg
Moolishar (Raphanus Sativus)	50mg
Makoi (Solanum Nigrum)	50mg
Kakdi Beej (Cucumis Utilissimus)	50mg
Daruhardra (Berberis Aristata)	50mg
Mulethi (Glycyrrhiza Glabra)	50mg
Amla (Emblica Officinalis)	50mg
Kantakari (Solanum Surattense)	50mg
Anantmool (Hemidesmus Indicus)	50mg
Jeera (Cuminum Cyminum)	50mg
Sajji Khar Mineral	20mg
Sindhav Mineral	20mg
Lajjalu (Mimosa Pudica)	25mg
Chirata (Swertia Chirayita)	25mg
Shatavari (Asparagus Racemosus)	25mg
Jav (Hordeum Vulgare)	25mg
Badi Elaichi (Amomum Aromaticum)	25mg
Saunf (Foeniculum Vulgare)	25mg

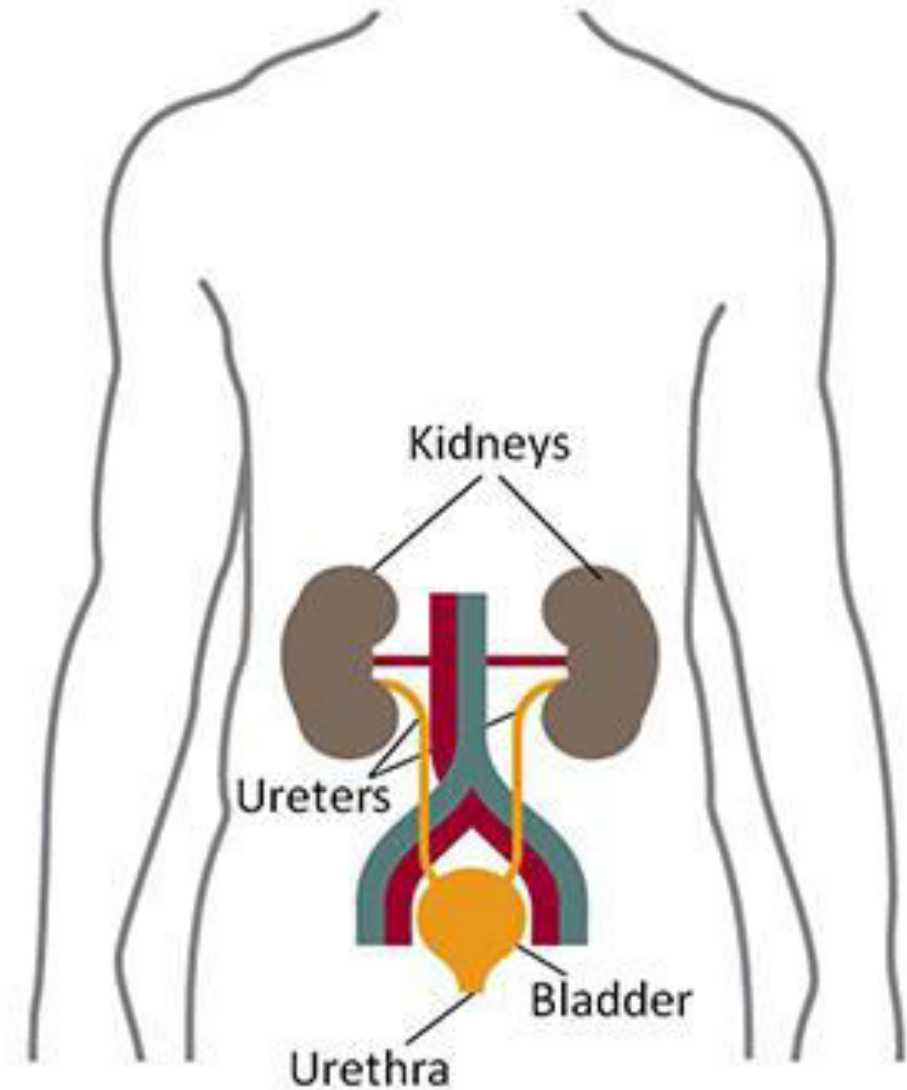

WHAT IS KIDNEY

One of a pair of organs in the abdomen.

The **kidneys** remove waste and extra water from the blood (as urine).

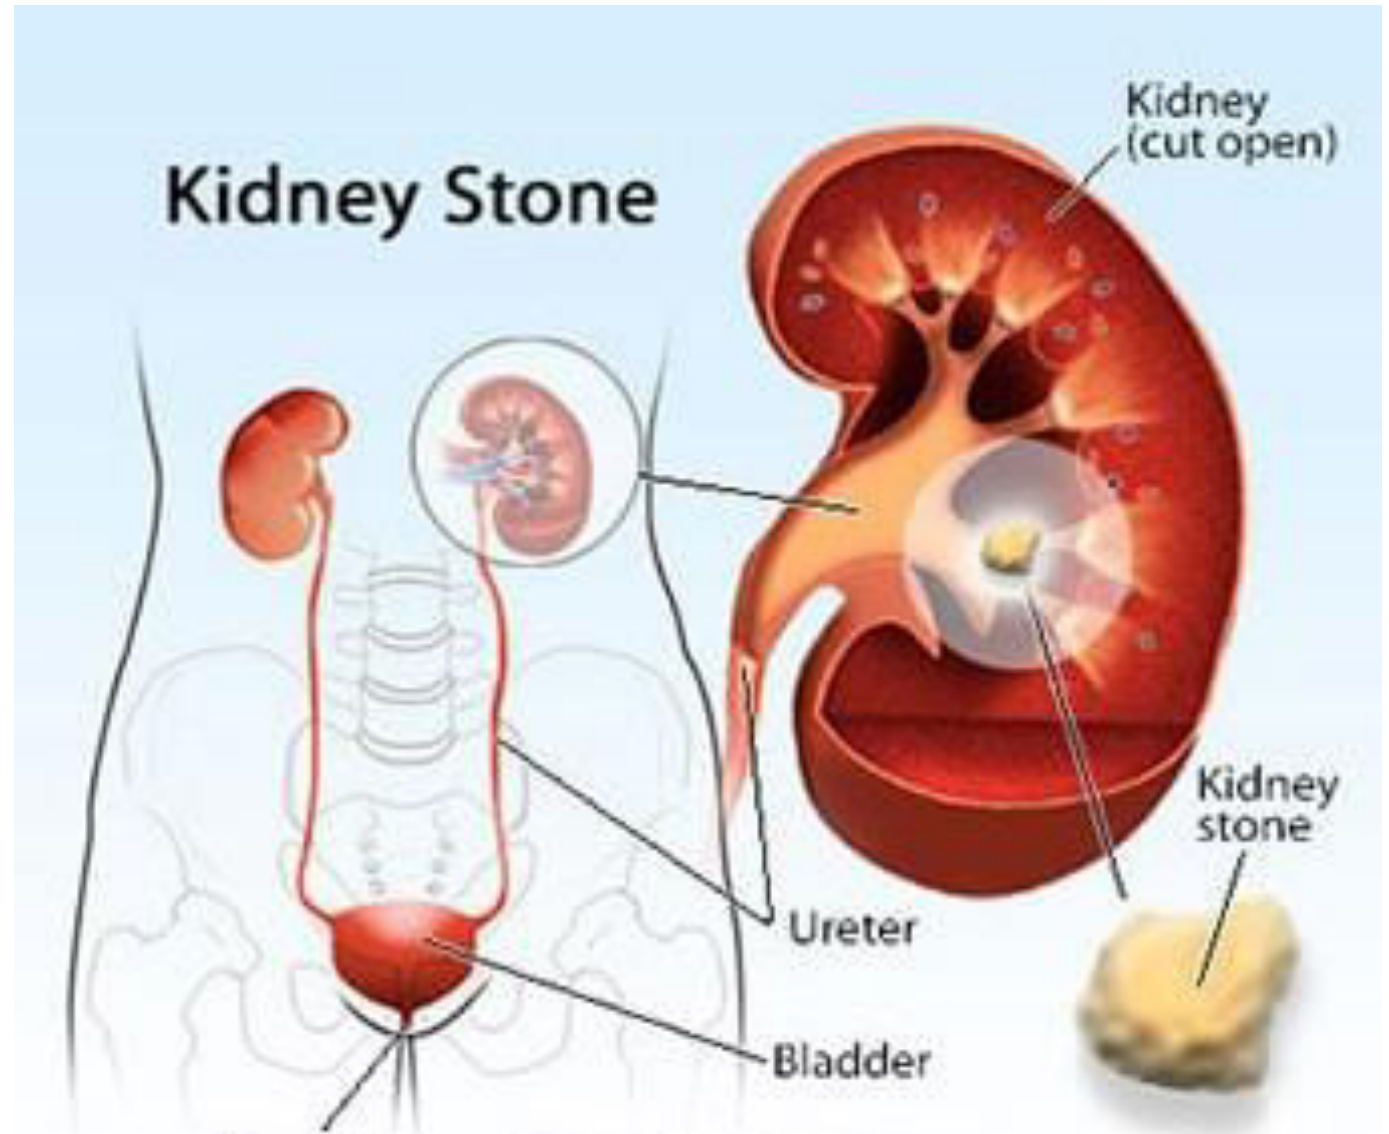

Help keep chemicals (such as sodium, potassium, and calcium) balanced in the body.

The **kidneys** also make hormones that help control blood pressure and stimulate bone marrow to make red blood cells.

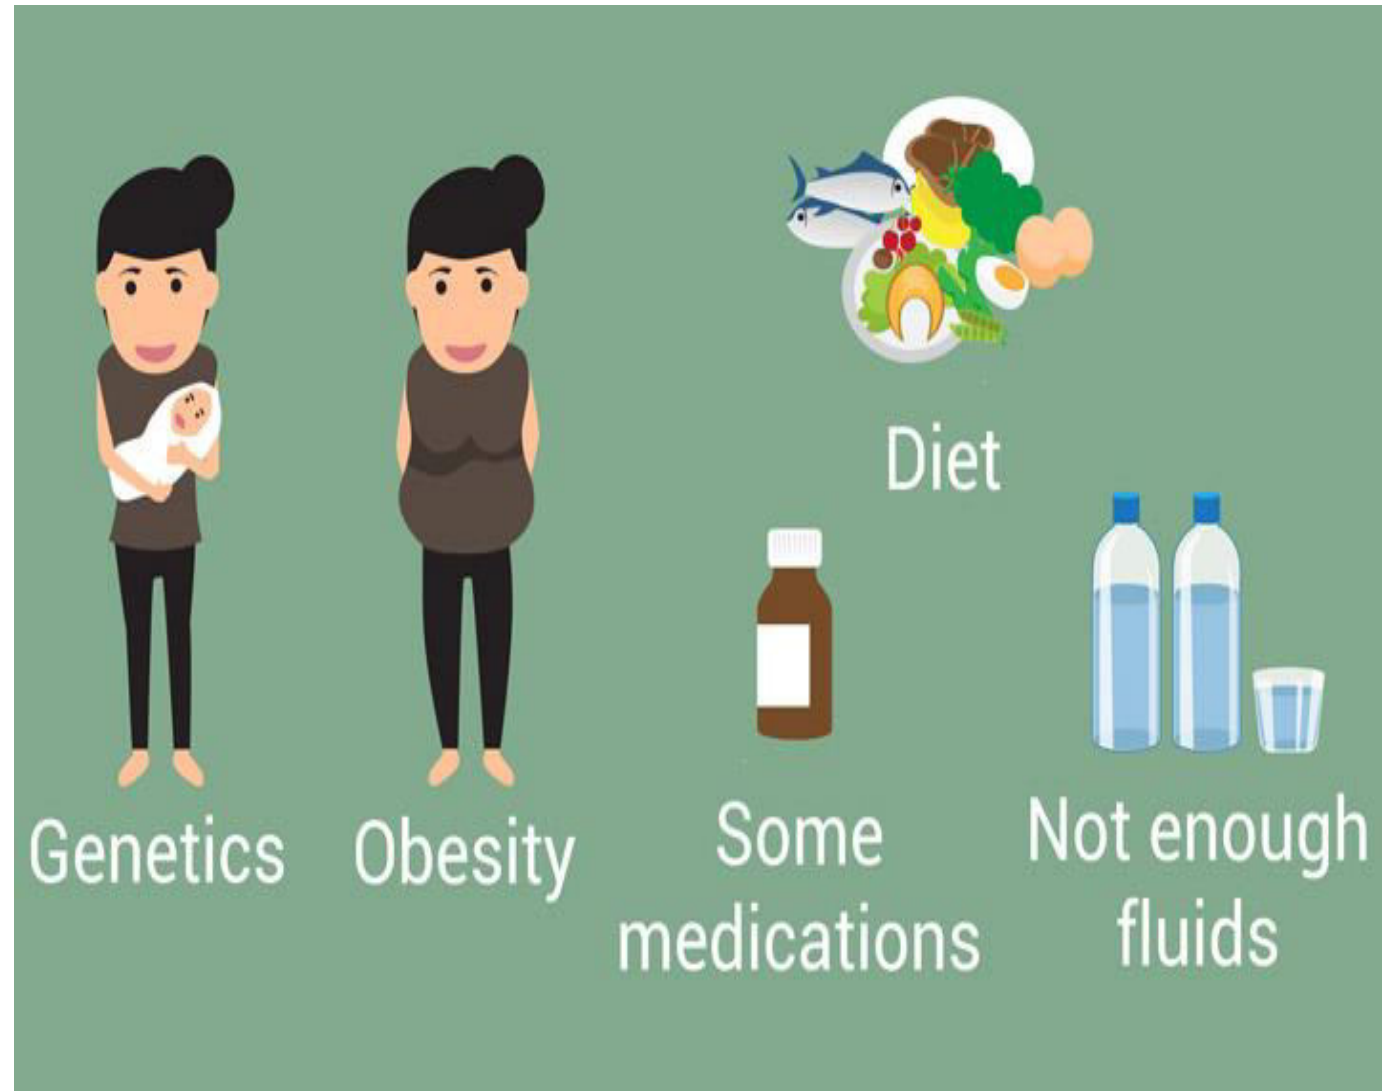

WHAT IS KIDNEY STONE

- A small, hard deposit that forms in the kidneys and is often painful when passed.
- Kidney stones are hard deposits of minerals and acid salts that stick together in concentrated urine.
- They can be painful when passing through the urinary tract, but usually don't cause permanent damage.

WHAT IS CAUSE OF KIDNEY STONE

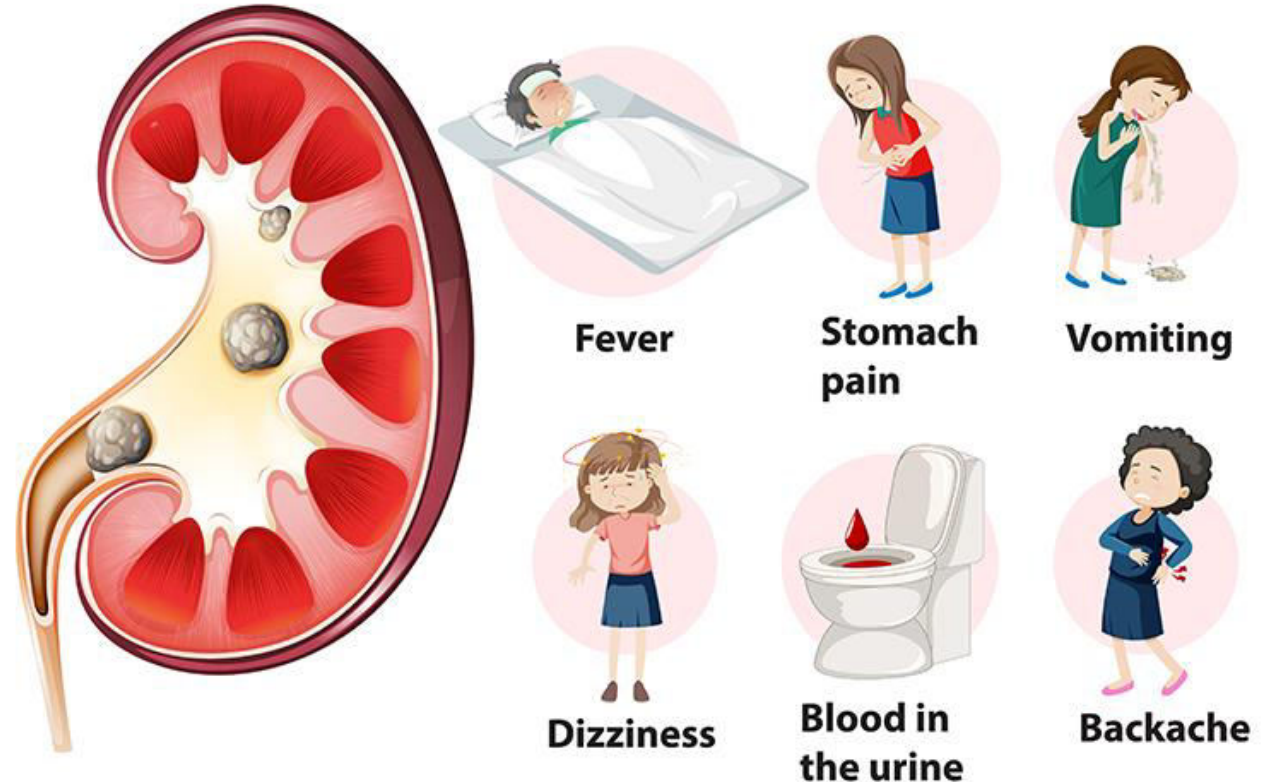

- **Kidney stones** form when your urine contains more crystal-forming substances — such as calcium, oxalate and uric acid — than the fluid in your urine can dilute.
- At the same time, your urine may lack substances that prevent crystals from sticking together, creating an ideal environment for **kidney stones** to form

SYMPTOMS OF KIDNEY STONE

- Pain in the back, belly, or side.
- Pain or burning during urination.
- Urgent need to go.
- Blood in the urine.
- Cloudy or smelly urine.
- Going a small amount at a time.
- Nausea and vomiting.
- Fever and chills.

KIDNEY STONES – SYMPTOMS

HOW TO PREVENT KIDNEY STONE

PROVEDA DR. NUTRICIO KIDNEY STONE SYRUP

- Kidney Stone Syrup is a unique formulation to destroy and reflux out any calculi in urinary tract (kidney, urethra, and urinary bladder).
- Urinary calculus is a calculus formed in any part of the urinary tract.
- Calculi may be large enough to cause an obstruction in the flow of urine or small enough to be passed with the urine.
- A major causative factor in the development of calculi (stones) is elevated cholesterol levels, which form the basis of that which holds stones (calculi) together..

PASHANBHAD (BERGENIA LIGULATA)

- **Pashanbhed** is mostly used for the removal of **kidney** and urinary tract **stones** due to its antilithic property.
 - According to Ayurveda, consuming **Pashanbhed** powder increases urine production
 - It helps in easy removal of **stones** due to its Mutral (diuretic) property.
-

GOKHRU (TRIBULUS TERRESTRIS)

- **Gokshura** reduces the risk of **kidney** stones due to its Mutral (diuretic) property which increases the urine output and helps flush the toxins from the urinary tract and **kidneys**.
- It helps prevent **Kidney stone** formation and dissolve the existing **stones** due to their diuretic properties

PUNARNAVA (BOERHAAVIA DIFFUSA)

- **Punarnava** may be **good** for the **kidneys**. It has diuretic and anti-inflammatory properties due to which it may be **useful** in reducing the risk of inflammatory **kidney** diseases.
- In traditional medicine, **Punarnava** has been used to manage **kidney** stones and **kidney** disorders

VARUN (CRATAEVA NURVALA)

- Varun is one of the herbs which helps to break renal calculi and reduce the size of the stone. This is because of its penetration property. Varun also helps to expel it out because of its Mutral (diuretic) nature.
 - Varun helps to control burning sensation. This is because of its Mutral (diuretic) effect. It increases urine flow and reduces the symptoms of UTI like burning sensation during urination.
-

KULTHI(MACROTYLOMA UNIFLORUM)

- Kulath ki daal, or **kulthi** is one such legume which has been found to play a vital role in the treatment of **kidney stone** disease.
- It is estimated that about 12 per cent of the world's population experiences **renal stones**, also called **renal** calculi.

KUSHA GRASS (DESMOSTACHYA BIPINNATA)

- Diuretic property and Cooling property of this drug helps to treat the burning micturition and retention of urine in the renal calculi and cleanse the urinary bladder.
-

BENEFITS OF KIDNEY STONE SYRUP

- It gives benefits in Urinary calculi, urethral calculi, oliguria, burning micturition, urinary tract infections crytalluria , edema
- It inhibits the formation of phosphate
- precipitate and has shown better potential in preventing the formation of calcium precipitate
- Break and dissolves stone easily
- Stops sever pain of kidney and urethra.
- It cures all types of urinary tract infections and other urinary problems.

The image shows the packaging for Dr. Nutricio Wellness Kidney Stone Syrup. The top half features a red background with a detailed illustration of a kidney containing several yellow and orange stones. The brand name 'Dr. Nutricio wellness' is at the top left. Below the illustration, the text 'KIDNEY STONE SYRUP' is prominently displayed in red and black. Underneath, it says 'A NATURAL WAY TO SAFEGUARD THE KIDNEY' and 'Relieves from Kidney Stone Improves Renal Function'. A box labeled 'POWER OF' lists ingredients: Pashanbhed | Gokhru | Varun | Punarnava | Kulthi | Kush Grass. At the bottom, it states 'Net Vol : 200ml'.

Nutricio Kidney Stone Syrup is a proprietary ayurvedic supplement. It is used in the renal calculi. It is very effective for relieving kidney stones by helping them flush out. It strengthens the kidneys and helps to shield you from urinary tract infections.
