**POWER OF**

**9**

Tulsi | Clove | Shunthi  
Mulethi | Pippali | Turmeric  
Camphor | Vasa | Honey

**Net Vol : 30ml**

# PROSHIELD

## Mouth Protect Spray

### Tulsi

- Tulsi leaves help improve the individual's ability to fight against common cold as well as cough. Tulsi boosts the production of antibodies thereby preventing the onset of any infections. Tulsi has **cough relieving properties**. It helps soothe the airways by helping you cough out the sticky mucus.

### Clove

- Cloves: Cloves is a **treasure trove of anti-inflammatory compounds**, which can come handy during times of sore throat, cough, cold and sinusitis. You can chew on to some cloves raw, or mix it with hot water and drink it early morning and even mix it in your cup of chai.

### Shunthi

- † clears **colds** and alleviates **cough** and breathing difficulties. In Ayurveda fresh ginger (ardraka) is used as well as dry ginger (**sunthi**).

# PROSHIELD

## Mouth Protect Spray

### Mulethi

- It is due to its **expectorant and bronchodilator properties** that it is known to provide relief from conditions like cough and bronchitis.

### Pippali

- Pippali is an effective herb in managing cough and cold. Pippali **controls cough, releases mucus, clears air passages**, thus allowing the patient to breathe freely. This is because Pippali has decongestant, bronchodilator and expectorant effects

### Turmeric

- While the antiviral and antibacterial properties of turmeric can help battle disease, its **anti – inflammatory property helps** in easing the effects of cough and cold. Helps in detoxifying your body

# PROSHIELD

## Mouth Protect Spray

### Camphor

- Camphor oil **works as a decongestant and cough suppressant**. According to a 2010 study, vapor rub was most effective in relieving night cough, congestion, and sleep difficulty in children with upper respiratory tract infections.

### Vasa

- Vasa offers quick relief in various types of coughs and colds and sore throat. **Reduces spasm in respiratory tract and aids in easy breathing during a cough or cold**. Helps treat symptoms associated with cough and cold. Helps reduce viscosity of bronchial secretions and expectorate out phlegm.

### Honey

- **Honey has antimicrobial properties**, which may allow it to fight some bacteria and viruses. One study found that honey was effective in relieving coughing as a symptom of a cold in children over the age of 1 year.
