Sexual Dysfunction in Males

- Sexual dysfunction can affect men of all ages, but is especially common in older men. The most common problems related to sexual dysfunction include *ejaculation disorders, erectile dysfunction and inhibited sexual desire. These issues can often be corrected by treating the underlying causes*

What is sexual dysfunction in males?

Sexual dysfunctions are physical or psychological problem that prevents you or your partner from getting sexual satisfaction. Male sexual dysfunction is a common health problem affecting men of all ages, but is more common with increasing age.

What causes sexual dysfunction in males?

PHYSICAL CAUSES

- Low testosterone levels
- Prescription drugs (antidepressants, high blood pressure medicine)
- Blood vessel disorders such as atherosclerosis (hardening of the arteries) and high blood pressure
- Stroke or nerve damage from diabetes or surgery
- Smoking

PSYCHOLOGICAL CAUSES

- Concern about sexual performance
- Marital or relationship problems
- Depression, feelings of guilt
- Effects of past sexual trauma
